By direction from the NYS Governor's office, effective March 17, 2020 and until further notice, only Essential SUNY employees shall report to work.

The CMLAF is an Essential Service and our staff will continue report to work and provide care for the animals in house. Non-essential services however will now be discontinued. All wetlab training will be cancelled as of tomorrow March 18. We will no longer process animal orders or accept new imports.

Faculty are strongly encouraged to NOT begin any new animal experimentations or studies. Technical support from LAF will be very limited. However ongoing animal studies and breeding colony maintenance should continue. Please limit breeding to that which will maintain the colonies.

If any lab cannot maintain their animal studies, please contact Dr. Martin for possible assistance.
