A 3-DAY INTRODUCTORY WORKSHOP IN POPULATION PK DATA ANALYSIS WITH NONMEM®

A HANDS-ON COURSE USING NONMEM®

Thursday, May 12 – Saturday, May 14, 2016
Niagara Falls, NY

WORKSHOP SYNOPSIS

This introductory population PK training workshop has been designed to provide the necessary information to successfully implement population pharmacokinetic methodology in a drug development program and to provide the foundation for understanding the basics of NONMEM coding and interpretation of NONMEM output. The material is structured to impart both the theoretical and practical aspects of the population approach and is versatile so that participants with diverse backgrounds and areas of expertise may benefit. Examples of the use of population PK studies in drug development programs, especially those from the published scientific literature, will be presented to provide specific details of various implementations and better illustrate essential aspects of population PK methods. Emphasis will be placed on compliance with the FDA’s Guidance for Industry on Population PK and the EMA’s Guideline on Reporting the Results of Population PK Analyses; participants will gain an appreciation for the importance of protocol compliance, the essentials of accurate and sufficient data collection, and learn how to proactively plan in order to maximize study effectiveness.

The workshop content is provided as a combination of formal lectures, review of data, code, and data analysis results, and hands-on exercises. Participants will use their own laptop computers, with which they will be able to practice coding control streams, running various models, and evaluating the results. A thorough examination of an example dataset, from development of the structural model, through covariate analysis, and model refinement will be covered. Overall, this workshop will provide the participants with a comprehensive understanding of the population PK approach to data analysis, its usefulness and added value in drug development, as well as when and where to employ population PK methods and sparse sampling within a given development program. The format is designed to be both comprehensive and interactive.

LEARNING OBJECTIVES

Following the workshop, the participant should be able to:

1. Understand the conceptual basis and rationale for the population approach to data analysis, its benefits and advantages, including where and when population methods may be optimally applied during the drug development process
2. Identify the critical logistical and practical issues involved in study design, protocol development, case report form development, overall planning, and efficient execution for population PK studies
3. Write, execute, and de-bug basic NONMEM® control streams for structural PK models
4. Outline the requirements and format for basic NONMEM® datasets
5. Understand the importance of exploratory data analysis (EDA) and the interpretation of standard goodness-of-fit diagnostic plots
6. Perform covariate analyses to evaluate determinants of variability by understanding, identifying, and coding basic functional forms for covariate-parameter relationships
7. Understand the basis for model selection strategies and discriminate between candidate models on the basis of both quantitative and qualitative factors
8. Understand and interpret NONMEM output, including error messages, and have insight into potential model refinement issues

COURSE INSTRUCTION

The workshop is organized and taught by experienced pharmacometricians from Cognigen Corporation and the University at Buffalo Department of Pharmaceutical Sciences. Cognigen Corporation, a wholly owned subsidiary of Simulations Plus, Inc., has been providing clinical pharmacology and pharmacometric consulting services, including population PK/PD modeling and simulation to the global pharmaceutical industry for over 20 years to generate and communicate the knowledge required for time-sensitive decision-making and regulatory review. The course is organized and taught by Jill Fiedler-Kelly, co-author of Introduction to Population Pharmacokinetic/Pharmacodynamic Analysis with Nonlinear Mixed Effects Models (John Wiley & Sons Inc., 2014).

This session is followed by a 3-day separate course in the concepts and applications of Pharmacokinetic/Pharmacodynamic Modeling coordinated by Dr. William J. Jusko. For information see: http://pharmsci.buffalo.edu/ or contact Suzette Mis at mis@buffalo.edu.
**AGENDA**

**Thursday, May 12, 2016**
- 08:35-08:45 Welcome and Introduction to the Workshop
- 08:45-09:45 The Population Approach in Drug Development
- 09:45-10:20 Population Modeling Basics
- 10:20-10:40 Break
- 10:40-11:50 NONMEM® Terminology
- 11:50-12:45 Estimation Methods in NONMEM®
- 12:45-01:45 Lunch
- 01:45-03:15 Brief Overview of the NONMEM® Program and Writing an NM-TRAN Control Stream
- 03:15-03:35 Break
- 03:35-04:05 NM-TRAN Lecture (cont’d)
- 04:05-05:20 NONMEM® Dataset Structure
- 05:20-05:30 Exercise: Writing Control Streams and Diagnosing Dataset Problems

**Friday, May 13, 2016**
- 08:30-09:15 Discuss Control Stream and Dataset Exercise
- 09:15-09:50 Exploratory Data Analysis
- 09:50-10:20 Exercise: Introduction to KIWI
- 10:20-10:40 Break
- 10:40-11:25 Running NONMEM® and Interpreting the Output
- 11:25-11:50 Data Review: Introduction to the Example Dataset and Exploratory Data Analysis
- 11:35-12:30 Exercise: Developing a Base Structural Model
- 12:30-01:30 Lunch
- 01:30-02:00 Base Structural Model Exercise (cont’d)

**Friday, May 13, 2016 (cont’t)**
- 02:00-02:10 Data Review: Base Model
- 02:10-02:45 Model Diagnostic Plots
- 02:45-03:05 Break
- 03:05-03:35 Model Selection and Covariate Evaluation – Part 1: The Covariate Assessment Process
- 04:25-04:40 Data Review: Introduction to Covariate Analysis and Coding Issues
- 04:40-05:30 Exercise: Forward Selection of Covariate Effects

**Saturday, May 14, 2016**
- 08:30 -09:00 Forward Selection Exercise (cont’d)
- 09:00-09:40 Data Review: Forward Selection Results and Multivariable Model Checking
- 09:40-10:20 Exercise: Backward Elimination of Covariate Effects
- 10:20-10:40 Break
- 10:40-11:20 Backward Elimination Exercise (cont’d)
- 11:20-12:00 Applications of Bayesian Parameter Estimation
- 12:00-01:00 Lunch
- 01:00-02:50 Diagnosing Errors, Model Checking, Model Refinement, and Model Evaluation Techniques
- 02:50-03:00 Data Review: Backward Elim & Model Refinement
- 03:00-03:20 Break
- 03:20-03:40 Pharmacoetric Analysis Planning and Population PK/PD Modeling and Simulation
- 04:20-04:30 Wrap-up and Final Q & A

---

**REGISTRATION DETAILS**

**Course location:** The course will be held at The Conference & Event Center Niagara Falls, 101 Old Falls Street, Niagara Falls, NY 14303. USA. Phone: (716) 278-2100. Fax: (716) 278-0008. The Conference Center is 28 min. from the Buffalo Niagara International Airport. Website: [http://www.ccnfnv.com](http://www.ccnfnv.com).

**Hotel location:** Sheraton at the Falls, 300 Third Street, Niagara Falls, NY 14303. USA. Phone: (716) 285-3361. The price is $120/night. *Hotel Deadline: April 11, 2016.* Website: [http://sheratonatthefalls.com](http://sheratonatthefalls.com).

**Fee:** The fee is $2500. A US government employee rate of $1900 and student rate of $1200 is available for up to 3 participants of each type. The registration fee includes hard-copy course documentation, USB drive with code examples, and a copy of the textbook, *Introduction to Population Pharmacokinetic/ Pharmacodynamic Analysis with Nonlinear Mixed Effects Models* by Owen and Fiedler-Kelly (John Wiley & Sons Inc., 2014). Lunches and break-time refreshments during the course are included.

**Requirements:** Laptop computers required to fully participate in hands-on exercises. Minimum configuration required: Google Chrome with Flash 9+ plugins.

**Registration:** Online registration will begin October 1, 2015. The course is limited to the capacity of 25 participants. Confirmation email of registration will be returned upon successful registration at the following website: [http://pharmsci.buffalo.edu/](http://pharmsci.buffalo.edu/) under Quick Links.

**Cancellations:** Cancellations with a full refund may be made until March 25, 2016. No refunds will be given for cancellations received after this date. Substitutions may be made at any time. Please inform UB course secretary of any substitutions.

**Payment:** Mastercard, Visa, American Express, and Discover card payments will be accepted only at the following website: [http://pharmacy.buffalo.edu/](http://pharmacy.buffalo.edu/) under Quick Links. Contact UB course secretary: Suzette Mis, (716) 645-4831; mis@buffalo.edu, if you need further assistance.

**Social Activities:** Cognigen Corporation will sponsor an evening excursion on Thursday, May 12.
